# Capture with confidence, every time

Nexus delivers a superior, automated video capture experience for any classroom, courtroom, or presentation space. Record, enhance, and stream your video with best-in-class reliability and powerful creative tools. The included 1 TB SSD drive, robust CMS integrations, and automated file management ensure all content gets safely recorded and delivered exactly where it needs to go.

# Key benefits

## Plays nice with everything

Designed with flexibility in mind, Nexus fits at the center of video workflows, seamlessly integrated with all of the hardware and software used in professional AV environments.

## Automated recording and streaming, for peace of mind

Never miss a recording or a live stream with fully automated video spaces. Nexus's powerful suite of automation and redundancy tools ensure your video always gets where it needs to go.

## Easy to manage at scale

Managing hundreds of devices from a centralized hub has never been easier. Epiphan's cloud based fleet management platform give you faster device deployment, easy maintenance, and guaranteed uptime.

## Creative freedom

Let your content shine with easy to use design tools for custom layouts, branding, graphics, and more.
