

# Hub M3 Global

## Next-generation Matter controller for Aqara and third-party devices with a focus on Edge Computing

The Hub M3 aims to elevate Aqara Home into a leading smart home ecosystem by supporting both Aqara Zigbee devices and thousands of third-party Matter accessories. It prioritizes local data and automation, functioning without internet or even the hub itself. Additionally, it serves as a robust infrared controller, linking your AC to Matter and adjusting it based on real-time room temperature from the Climate Sensor.

Focus on Privacy

IR Blaster with Feedback and Learning

Powerful Speaker and Custom Ringtones

Zigbee + Thread Gateway

Matter and Other Ecosystem Support

USB-C Port and Power Backup
