Professional Grade 8-Bay Thunderbolt 3 Storage Solution

With eight hot-swappable drive bays, ThunderBay 8 is like a high-performance personal data center for filmmakers, video production pros, photographers, graphic designers and small business workgroups. It offers massive, professional-grade storage capacity with real-world tested speed up to 2,586MB/s[1] in a desktop-sized design. Use mixed drives independently or combine drives as a RAID with SoftRAID.

With a locking front panel and security slot on the backside, the ThunderBay 8 is like an ironclad vault for your data. Plus, with front-panel LEDs indicating the status of each drive, you'll know at a glance if your data is secure. Its rugged heat-dissipating aluminum enclosure also features two Thunderbolt 3 ports, so you can breeze through business backups all the way up to today's largest RAW photo and multi-stream 4K video formats.
